Does the project change involve any new or modified:

1. conversion of public parkland or other Article 97 public natural resources to any purpose not in accordance with Article 97? Yes No
2. release of any conservation restriction, preservation restriction, agricultural preservation restriction, or watershed preservation restriction? Yes No
3. impacts on Rare Species? Yes No
4. demolition of all or part of any structure, site or district listed in the State Register of Historic Place or the inventory of Historic and Archaeological Assets of the

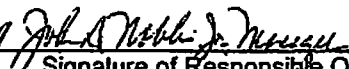

USACE, but resolving the issue would have led to significant project delays. Instead, the original Proponent purchased an adjacent home on Cumberland Avenue (0.36 acres of land) and used that house lot (after demolition of the house) as additional frontage on Cumberland Avenue. This is the current entrance to the remainder of Phase 1 and will serve as the entrance for all subsequent phases, with an additional entrance to the south onto Remington Drive to be added in Phase 4. This new entrance eliminated the wetland crossing of Delphis A. Monast Jr. Way. This change resulted in the reduction of 4,450 square feet of BVW impact and elimination of an intermittent stream crossing. Wetland impacts have been updated to reflect new field information from a recent delineation and design refinements resulting in additional reductions in wetland impact.
